While mass media has been carefully filtering some of this information while ignoring facts, the Rusty Shackelford YouTube channel has been providing a raw, unfiltered so information by posting, on a regular basis, drone footage of Epstein Island and its surroundings.

The footage captured in the past weeks reveals that there are strange things happenin island. Here are some examples.

Hustle and Bustle

Considering the fact that Litle Saint James was the site of heinous crimes involving peo people, one would expect the island to be treated like a crime scene that is completely to non-investigators. That is not what is happening.

After a crime scene has been discovered, it is important that measures are taken t secure and protect the scene from contamination. In order to maintain the integrity of the scene, law enforcement must take action to block off the surrounding area as well as keep track of who comes in and goes out. By taking these precautions, officers can ensure that evidence that is collected can be used i court. Evidence that has become contaminated, tampered with, or mistreated car pollute the scene and cause a case to be thrown out of court.

Two weeks prior to the FBI raids on Epstein Island, a drone filmed a team of workers

This footage was filmed on July 30th, 10 days before Epstein's death and 12 days before the FBI can see construction workers, heavy machinery and bags of material, possibly concrete.

This footage was taken a few weeks after Epstein's arrest. Lots of trash being thrown out, including mattresses and box springs. Could there be incriminating evidence in there?

Several vehicles on the island also keep moving around – including an ambulance that has the letters L.S.J. (Little Saint James). Why is there even an ambulance on an island that has a hospital?

In July, the ambulance was parked on the roof of a building.

A few weeks later, the ambulance was moved to a different spot.

After Epstein's death and after the FBI raids, the island was still bustling with activity

Considering the fact that Epstein is dead, why is there still maintenance on the island is paying these workers? Are the checks coming from the \$577 million trust fund crea Epstein two days before his death – with anonymous beneficiaries?

notices the drone. He then lingers for a couple of seconds and hides inside his truck.

Does this look like Epstein?

Drone footage captured in the past weeks also captured never-seen images of the infamous “temple”.

Inside the Temple

The temple in 2017. The golden dome and cockatrice are now gone.

There's been lots of speculation concerning the strange temple on Epstein Island. Built on a 100-foot elevation, the temple is believed to be sitting on a network of underground tunnels. Recently released drone footage took some close-up shots of the temple, revealing several strange details.

First, the main "door" of the temple is actually painted on.

The door on the Epstein temple.

On the left of the door are the letters JE – the initials of Jeffrey Epstein.

The same initials can be found on the left of the door of Epstein's NYC mansion.

While mass media sources have been claiming that the temple was actually a gym, footage filmed inside the temple reveals that it is definitely not a gym.

Inside the temple are several mattresses and scaffolding. No gym equipment in sight.

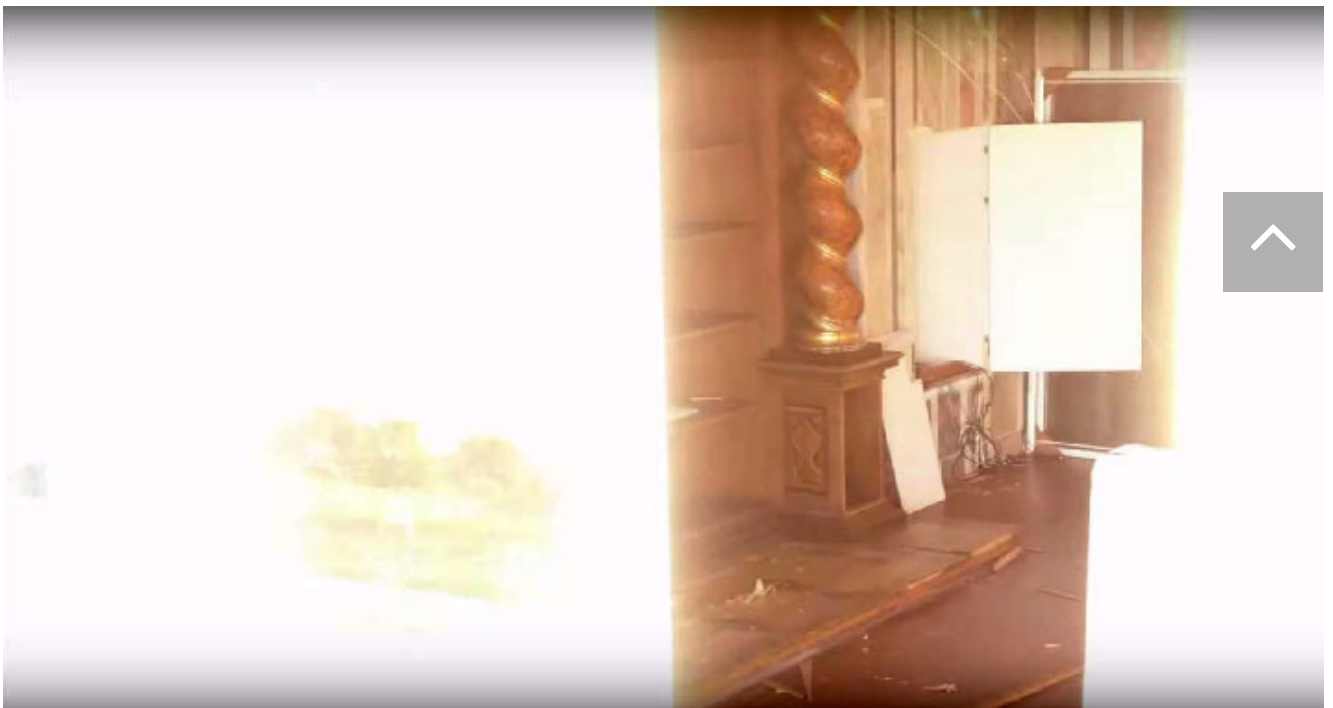

Footage from the other window shows a closer shot of the mattresses (which are wrapped in plas

Using color correction, the drone was able to provide a clearer view of what's inside the mysterious room.

Here, we see wooden floors and broken wood pieces. .

As the drone films upwards, we can see a bookshelf, an ornamental column, and some wiring.

Once again, we have clear proof that this is not a gym. The fact that mass media has been propagating this piece of fake news is telling. And, considering the fact that everything in this temple is highly symbolic, what we're seeing here is also highly symbolic.

Furthermore, the twisted design of these pillars is significant: They're called Solomon columns.

The spiral shape, common in nature, has adorned buildings since the dawn of recorded history. According to legend, spiral columns ornamented the Temple of Solomon in Jerusalem.

– thought.co, What is a Solomonic Column?

Masonic lore, ritual, and symbolism are heavily based on the legend surrounding the Solomon. Combined with the Masonic sundial at the center of Epstein island, there's a "occult elite" pattern emerging from this place.

@ricky27704102

The twisted columns that support the canopy above the altar of Les Invalides. Solomonic columns symbolised supreme wisdom and were a feature of the Temple in Jerusalem were they were known as Jachin and Boaz. They appear frequently in Royal Renaissance art.

the death of Epstein and not way before? Why did they allow people to move and work on the island beforehand?

The other question one might ask is: What are they doing on this footage?

An agent stands inside a room with computers and other equipment wrapped and, apparently, ready to be shipped.

Once the agents realized that a drone was filming them, they covered up the window.

Why so much secrecy?

In Conclusion

The drone footage taken over the last few weeks prove that heavy construction work had taken place on Epstein Island only days prior to the FBI raids. Considering the fact that these contractors were paid by Epstein, there is a distinct possibility that they were ordered to destroy evidence and bury whatever needed to be buried. When the authorities finally raided the island (days after Epstein's death), they made it obvious that they did not want to be filmed.

Not unlike what happened at the Metropolitan Correctional Center on the day of Epstein's death, authorities have been displaying a constant pattern of "purposeful carelessness" throughout the Epstein debacle. Despite the fact that the island was a known and well-documented haven for child abuse at the hands of the world's more powerful people, the investigation surrounding it is, to say the least, sluggish. In short, we are witnessing the elite covering up its tracks and burying the Epstein case under a pile of literal concrete.

If the "God" you are referring to is from the Bible, then the "heaven" you referring to is actually hell. Look at the deeds of the so-called "God" of th and you cannot fail to notice that these can only be the deeds of Satan. Sa the father of the lie and the ultimate lie is the Bible itself. The Bible is a c case of controlled opposition, where our perception of 'good vs evil' is de Satan.

People don't realize the deity they give praise to is the angel gadreel (the short hand version people use is "god"). Gadreel/God is the creator. The Creator is El or Yahweh

On the trash-photograph I see support-beams, like from a mine, and a staircase-unit. What level/etage in which part of a 'building' on the island, has been cleared out and, indeed, possibly disappeared for investigation??

This is such a unrivalled case, it is mindboggling to see our normally sensation-hunting mainstream media report almost nothing. No human interest enough in this case? No, models, politician sex, drugs – it is all there. And deafening silence but for a steady going promoting of the next young scrambled victims with a one-eye profile-pic.

I'm not surprised at all re the temple. The workers are carrying out contractual obligations re of what happened to Epstein. His estate are sanitising it (and destroying all remaining evidence before sale. Epstein had already agreed to sell it to one of the Silicon Valley guys possibly Spi can't remember which one).

Prince Andrew has suddenly stepped up his public engagements (obvious why). However, th of Northern Ireland cancelled his visit because they are suspicious of him in relation to the unaddressed allegations. It would be great if he was boycotted at every attempt until he was from the payroll of the monarchy altogether.

@ von_krieg: I find this story a bit fishy... A drone flies over a private island under investigation by the FBI, doesn't get shot down and happens to catch a glimpse of a man who's Epstein's doppelganger? That's definitely weird.
