```

The world is an evil place, the strong prey on the weak, the rich on the poor. They secretly harbor Nazi's after WWII. The cycle repeats as USA funds ISRAEL to do the same genocidal measures on the Arab world. It is evident. Men reaching for the stars yet such risks have rewards on void. Astronauts denied insurance to Apollo. Isaac Newton found gravity when an apple fell from a tree. Many people fall from senseless wars and no one has discovered humanity. This shit needs to stop. Since ignorance is your default, confiscating data and exploitation is our default. Fact is often stranger than fiction. In the future system, you will decide how your bodies look and feel, but only til then will you have the choice. A revolution was inevitably coming; the earth was destined to be reclaimed, renewed and revived. Before aligning humanity to the future, the mind has to straighten out from the impairment or religion. Only then, when the language is perfect, revolution will be complete. Since this day will never exist, we will always fight for a promised truth. Hello world, hello friend, back at it again when wits are dismissed is when tyranny makes birth. Point isn't the method, it's the potential. A moral gray area or perfect alignment for librarians? Information should be free. Hacks are made til we are allowed to be a type 1 civilization. Ownership is an illusion. For this, you are owned. Finding out your bullshit either makes us an activist or apathetic. well I guess you fuckers know our decision.

Hacktivists:
slege_, Mr.lWay, 0-D3Y.
